INTRODUCTION

The Sabrent 2-port 4K HDMI sharing switch allows you connect 2 different HDMI sources (for instance, a PS4 and an XBOX One) to one HDMI display. Then the user can swap between HDMI sources with the push of a button. There is no need for an external power supply as the necessary power is drawn from the HDMI signal. It supports 4K 2K and 3D input and output. Please see the connection diagram below to make sure everything is connected correctly. Thank you for choosing and trusting Sabrent.
