## PACKAGE CONTENTS

- USB-C Universal Docking Station
- USB-C cable (70cm)
- 120W (20V/6A) power adapter
- User manual

## SUPPORTED OPERATING SYSTEMS

- Windows
- macOS

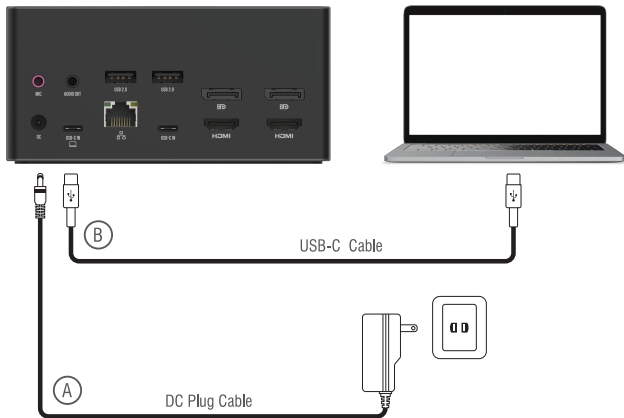

## PRODUCT OVERVIEW

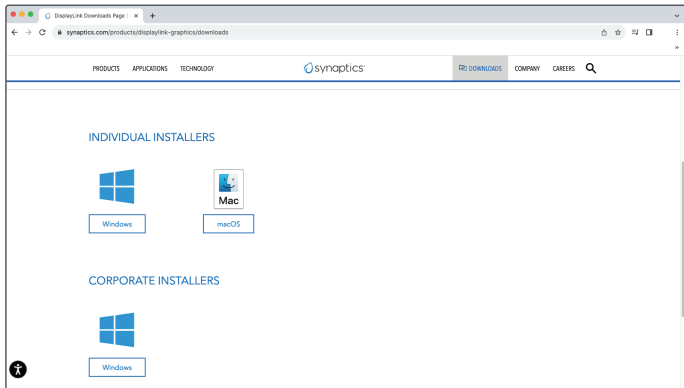

- A. USB-A 5Gbps ports
- B. UHS-I SD/microSD card slots
- C. Headphone/microphone jack
- D. USB-C 10Gbps port
- E. USB 2.0 ports
- F. Headphone jack
- G. Microphone jack

- H. Power jack
- I. USB-C 10Gbps port to host for I/O and charging
- J. Gigabit Ethernet port
- K. USB-C 10Gbps port with display output support
- L. DisplayPort ports
- M. HDMI ports

## GETTING STARTED

- A. Plug the adapter into an available outlet and connect it to the docking station's power jack (H).
- B. Insert the included USB-C cable into the USB-C upstream port on the docking station (I) and connect the other end of the cable to an available Thunderbolt or USB port on your host PC, tablet, or other compliant USB-C device.

C. Download and install the latest display drivers by visiting:

<http://displaylink.com/support/downloads.php> and when done, restart your system.

D. The docking station is now ready to use. Connect your display(s) and other peripherals to expand your system's capabilities.
