

USB 3.0 to SATA Dual Bay External Hard Drive Docking Station with Built-in Cooling Fan

With a Sabrent EC-HDFN SATA Docking Station you can easily Hot-Swap 2.5"/3.5" SATA Hard Drives when connected to your Desktop or Notebook. As a Standalone Duplicator Dock it can be used to duplicate/clone an existing hard drive without connecting to a computer.

SATA DOCKING STATION MODE

1-Connect the power adapter to the back of the dock

2-Connect the power cord to the power adapter

3-Connect the power cord to a power outlet

4-Check the power adapter brick for the Green LED

5-Switch dock to **LOCK** on the back

6-Connect USB cable to the back of the dock

7-Connect the other end of the USB cable to your computer USB port

8-Press the power button on the back of the dock

9-You will get **RED** power lights

10-Insert your hard drive in **HDD1**

You will get a beep and a **BLUE LED** on **HDD1**

11-If using a second hard drive, insert it in **HDD2**

You will get **2** beeps and **BLUE LEDs** on **HDD1 & HDD2**

STANDALONE DUPLICATOR MODE

Note: Do not connect the USB cable to a computer when cloning

1-Insert your **Source Disk** in **HDD1**

Your **Source Disk** must have equal or less capacity compared to your **Target Disk**

STANDALONE DUPLICATOR MODE

Note: Do not connect the USB cable to a computer when cloning

2-Insert your **Target Disk** in **HDD2**

Your **Target Disk** must have equal or more capacity compared to your **Source Disk**

3-Move the switch to the **UNLOCK** icon on the back of the dock

4-Press the **POWER** button and wait for 10 seconds

5-Hold the **CLONE** button located on the front for 10 seconds or until **GREEN** LED flashes

6-**GREEN** flashing lights indicate that the clone process has started

7-The cloning process is complete when dock beeps once and all the lights turn solid

8-Press the **POWER** button and eject your drives
