ATTENTION

- In order to extend the lifespan of your battery, please use and recharge it at least once every 3 months.
- Whenever possible, use certified or original cables. In general, if a cable gets too hot to the touch, stop using it immediately and replace it with a thicker cable.
- Avoid dropping it.
- Do not disassemble, do not pierce. Do not spill any liquids on it.
- Do not leave your battery under direct sunlight for extended periods of time. Avoid extreme temperatures (either cold or hot), rain, and humidity.
- Overall, use common sense as you would with any other electronic device.
