

# 4-PORT AND 4-COMPUTER USB 2.0 PERIPHERAL SHARING SWITCH

COMPATIBLE

USB 2.0

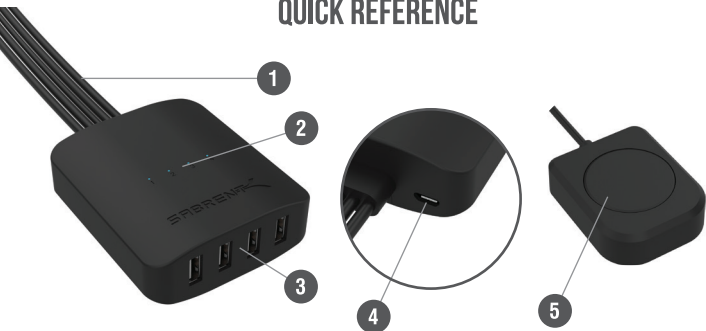

HIGH SPEED

USB-USS4 USER MANUAL

## INTRODUCTION

The Sabrent USB Sharing Switch allows keyboards, mice, printers, flash drives, external hard-drives, USB compatible monitors, and other USB 2.0 devices to be shared by multiple computers only with the push of a button.

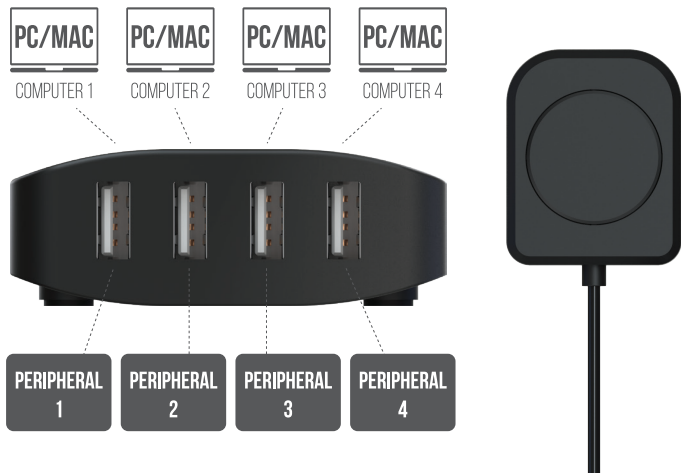

## QUICK REFERENCE

1. USB 2.0 Output Ports (1 cable per computer)
2. Blue LED to indicate PC selection
3. USB 2.0 Input Ports (connect your peripherals here)
4. Optional Mini USB Power Input (for peripherals that need additional power)
5. PC Selection Button

## HARDWARE INSTALLATION

1. Plug all the USB peripherals that you want to share into the front USB ports of your Sabrent Sharing Switch.
2. Plug only one USB cable into each computer you are using. It is not necessary to connect all 4 computers at once.
3. Push the sharing switch to alternate between computers. The blue LED will let you know which computer the device is currently controlling.
